MEET PRAJAPATI

Full-Stack Developer | AI Automation Engineer

+91 9023968492 | pmeet9174@gmail.com | GitHub | Portfolio | Vadodara, Gujarat, India

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable web applications, RESTful APIs, and intelligent automation workflows. A genuine fast learner who rapidly adapts to new technologies and consistently solves complex errors with speed and precision. Proficient in React.js, Node.js, Python, PHP, ASP.NET, and databases including MySQL, MongoDB, Firebase, Supabase, and PostgreSQL. Experienced deploying AI agents using n8n and Make.com to automate real-world business processes.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript, TypeScript, Figma

Backend: Node.js, PHP, Laravel, ASP.NET, C#, Python, RESTful APIs

Databases: MySQL, Oracle, MongoDB, Firebase, Supabase, PostgreSQL, Airtable

AI & Automation: n8n, Make.com, AI Sensy, OpenRouter, WhatsApp Business API, Gmail API, Slack API, Airtable

Tools & Platforms: Git, GitHub, Railway, Android Studio

Programming Languages: C, C++, Java, Python, PHP, C#, JavaScript, TypeScript

EXPERIENCE

Trutopay | Remote

Full-Stack Development Intern Jan 2026 – Jun 2026

- Developed and maintained full-stack features for a web-based invoice and billing management system using React.js, Supabase, and Railway-hosted backend infrastructure.
- Built and integrated RESTful APIs enabling real-time invoice generation, quotation management, and recurring billing workflows with PostgreSQL as the data layer.
- Designed and deployed AI automation workflows using n8n to streamline internal business processes, reducing manual task handling by an estimated 40%.
- Collaborated with senior developers and product teams to deliver iterative releases, maintaining clean and scalable codebases following industry best practices.

PROJECTS

Trustopay – Invoice & Billing Management System (Web)

Tech Stack: React.js, TypeScript, Supabase, Railway, PostgreSQL, REST APIs | Live | GitHub

- Built a full-stack web platform for invoice generation, quotation management, and recurring billing with secure user authentication and role-based access control.
- Integrated Supabase real-time database with a Railway-hosted backend, achieving sub-second data synchronization and reliable API responses under concurrent load.
- Implemented TypeScript throughout the codebase to enforce type safety and reduce runtime errors in production.

Orion – Multi AI Agent System

Tech Stack: HTML5, CSS3, JavaScript, Python | Live | GitHub

- Architected a modular multi-agent AI system capable of handling diverse tasks concurrently, including Q&A, code analysis, and workflow automation.
- Designed a Python-based agent orchestration layer enabling plug-and-play integration of new AI capabilities with minimal configuration overhead.
- Deployed on Vercel with a responsive frontend interface for seamless user interaction across multiple AI agents.

E-Commerce Platform – Sports Shop

Tech Stack: ASP.NET, C#, MySQL, Visual Studio | GitHub

- Developed a full-stack e-commerce platform with user authentication, product catalog, filtering, shopping cart, and order management using ASP.NET MVC and MySQL.
- Built a secure admin dashboard for inventory tracking and order processing with session-based access control.

HR Screening AI Agent

Tech Stack: n8n, Gmail API, LinkedIn/Indeed Platform API, Slack, Airtable

- Automated end-to-end HR candidate screening by building an n8n workflow that ingests applications from LinkedIn, Indeed, and Gmail, scores candidates against job criteria, and notifies HR teams via Slack.
- Reduced manual screening effort by an estimated 60%, enabling HR teams to focus exclusively on pre-qualified shortlisted candidates stored and tracked in Airtable.

Invoice Reader AI Agent

Tech Stack: n8n, Gmail API, Platform APIs, Airtable

- Built an AI agent that automatically reads incoming invoice emails, extracts key fields (vendor name, amounts, due dates, line items) using NLP, and logs structured data into Airtable.
- Eliminated manual data entry for accounts payable workflows, reducing processing time per invoice and significantly lowering human error rates.

WhatsApp AI Agent – Startup Grants & Updates

Tech Stack: Make.com, WhatsApp Business API, AI Sensy, Facebook Manager, Airtable

- Developed a WhatsApp-based AI agent delivering real-time startup grant alerts and personalized business insights through a Pro Plan subscription model.
- Integrated Make.com automation with AI Sensy and Facebook Manager to manage subscriber lists, trigger message flows, and track engagement metrics in Airtable.

EDUCATION

Sardar Vallabhbhai Patel Institute of Technology (SVIT) | Vadodara, Gujarat
Master in Computer Applications (MCA) 2024 – 2026 | Current CGPA: 8.00

Dadabhai Navroji Institute of Computer Application | Gujarat
Bachelor in Computer Applications (BCA) 2022 – 2024 | CGPA: 8.89

ACHIEVEMENTS & HIGHLIGHTS

- Deployed 7+ web and full-stack applications on Vercel, Netlify, and Railway with production-grade infrastructure.
- Built 6+ AI automation agents using n8n and Make.com for HR screening, invoice processing, WhatsApp alerts, and code analysis use cases.
- Full-Stack Internship at Trutopay: Delivered real-world web features and AI workflows within a 6-month engagement.
- Consistent academic performer: BCA CGPA 8.32, MCA CGPA 8.89.
